VALUATION OF THE TARGET COMPANY

Based on the Valuation Report issued by the Valuer, a valuation of the entire equity interest of the shareholders of the Target Company was conducted with December 31, 2022 as the Valuation Date.

1. Valuation Approaches

The asset-based method and the income method are adopted for this appraisal, and ultimately the result of the asset-based method is selected. The reasons are as follows:

- (1) The asset-based method takes the replacement cost of assets as the value standard, reflecting the social necessary labor consumed by the investment of assets (purchase and construction costs). Such purchase and construction costs usually fluctuate with the national economy. The core assets of enterprises are inventories, fixed assets and land use rights, etc. The conclusion of the asset-based method has a large correlation with the replacement cost of such physical assets and other assets and liabilities on the book balance on the Valuation Date. The conclusion can relatively accurately reflect the comprehensive profitability of the assets and liabilities of the Target Company as a whole in the future.
- (2) The income method valuation is based on the expected income of the asset as the value standard, reflecting the size of the operating capacity (profitability) of the asset. The industry of the enterprise is capital-intensive. The scale of physical assets is large and there is a significant increase in value, resulting in a low overall return on assets. At the same time, the global economy has been affected by the impact of the epidemic in recent years, and the industry is still in a downward cycle in 2022, resulting in greater uncertainty in the income method.

2. Conclusion of the Valuation

Based on the asset-based method valuation for Target Company on Valuation Date of December 31, 2022, the book value of the total assets is RMB659.5727 million, and the appraisal value is RMB1,648.4392 million, the value increase is RMB988.8665 million, and the value increase rate is 149.93%. The book value of total liabilities is RMB411.7863 million, the appraisal value is RMB391.9503 million, the valuation decrease is RMB19.836 million, and the valuation decrease is 4.82%. The book value of net assets is RMB247.7864 million, the appraisal value is RMB1,256.4889 million, the value increase is RMB1,008.725 million, and the value increase rate is 407.09%.

The reasons for the increase and decrease of main assets are as follows:

The net book value of fixed assets-buildings is RMB84.9026 million, and the appraisal value is RMB178.7096 million. The value increase is RMB93.807 million. According to the analysis, the main reasons for value increase are: firstly, from the construction date of buildings to the valuation base date, due to the rise in labor costs of various materials, the cost level has increased to a certain extent, which results in valuation increase in origin value; secondly, the depreciation life of the enterprise is 5-12 years for structures and 20-30 years for buildings, while the economic durability period adopted by appraisal is 30-50 years, thus the financial depreciation period of the enterprise is less than the economic service life of the assets, which results in valuation increase in net value.

The net book value of equipment is RMB94.8841 million, the net appraisal value of equipment is RMB95.3155 million, and the value increase is RMB0.4314 million. The value increase is mainly due to the fact that the actual useful life of the enterprise's equipment is longer than the depreciation life, and some equipment adopts accelerated depreciation.

The net book value of intangible assets is RMB37.2658 million, the appraisal value is RMB925.9721 million, and the value increase is RMB888.7063 million, with a value increase rate of 2,384.78%. The main reason for value increase is that enterprise has obtained the land use rights at an early stage and its cost is low. Meanwhile, the price of industrial land in the suburbs has increased significantly in recent years.

The net book value of non-current liabilities is RMB19.645 million and the appraisal value is RMB0 million. The value decrease is mainly because the deferred revenue related to subsidies, of which the project has been completed.
